

# Rain Barrel Instruction Sheets

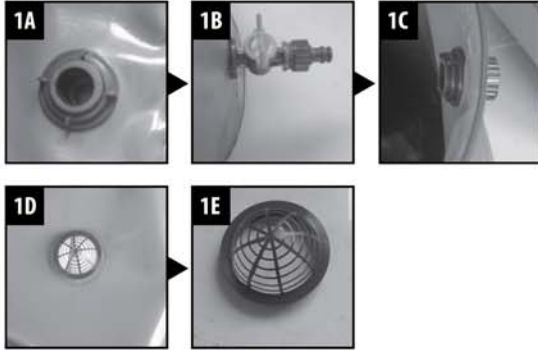

## Installation Tools – Tools required for set up:

Work gloves, hacksaw, level, safety glasses, tape measure, pencil, screwdriver

**Parts List** – Rain Barrel, legs (quantity differ per barrel size) drain spigot, overflow cap.

## Installation-

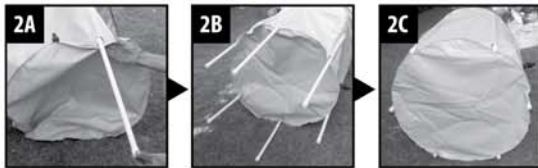

1. Connect the drain spigot to the fitting at the bottom side of the barrel  
[ See Fig 1A ,B]

2. Install the cap on the overflow fitting at the top side of the barrel  
[ See Fig 1C]

3. Install the cap and filter assembly on the lid of the rain barrel  
[ See Fig 1D, E]

4. Unfold the rain barrel and lay it on its side. Install the support legs into the built in sleeves on the sides of the rain barrel making sure the leg caps are positioned at the bottom of the barrel [ See Fig 2A, B, C ]

5. Zipper the lid closed.

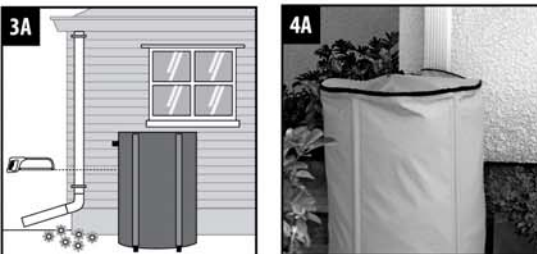

## Rain barrel Location

**Note:** Choose a downspout that has a level and firm surface beneath so that the Rain barrel will be level.

6. Position the Rain Barrel beside the downspout and mark the downspout at the mid way point from the top of the rain barrel to the bottom of the rain barrel. Cut off the downspout at this mark. [ See Fig 3A ]

**Note:** It may be necessary to remove the downspout from the wall to cut it.

7. Move the rain barrel into position against the wall on a level surface and insert the downspout on the wall into the Rain barrel. Zip the lid tightly around the downspout inserted into the rain barrel. [ See Fig 4A ]

**Note:** The inserted downspout will add stability to the empty Rain Barrel until it gets filled with water. However, it is recommended to add a couple of inches of tap water to the barrel for added weight and stability to prevent movement by heavy wind etc.

Once water is collected in the rain barrel, it can be emptied through the bottom spigot or unzip the top and use a watering can.

**Tip:** For Connecting additional rain barrels or for diverting water to various locations, use the Heaven + Earth Universal Rain Water Diverter Accessory which is available from your rain barrel dealer.

**Off season storage:** At the end of the season the rain barrel should be emptied and stored in a heated place in order to prevent freezing or damage to your rain barrel.

## ! Warnings:

Never allow children to play in or around rain barrel. Always securely attach the lid to avoid a child drowning.

Never drink water from the rain barrel. Use barrel water only for watering or outdoor cleaning purposes.

Always place the barrel on a flat and solid surface. Check the downspout does not contain heating cables before cutting. When installing use safety glasses and protective gloves.

Heaven+ Earth is not responsible for damages resulting from improper installation
